

Group 10: CSV Backup

Mission

Move data in and out of the tracker.

Add CSV import and export so transaction data can be opened in spreadsheet apps.

Required Features

Add at least these five features to your own copy of the budget tracker.

1. Export all transactions to a CSV file.
2. Import transactions from a CSV file.
3. Validate imported rows before saving them.
4. Use a backup filename that includes the current date.
5. Show how many records were imported or exported.

Stretch Ideas

- Skip duplicate imported rows.
- Export only expenses or only income.

Beginner Instructions

1. First make sure the base budget tracker runs.
2. Add one feature at a time.
3. After each feature, run ``python main.py``.
4. If the app breaks, undo only your last change and try again.
5. Prepare a short explanation of what each feature does.

Presentation Tip

Do not only show code. Show the menu, add sample data, run your new feature, and explain the part of the code your group changed.
