

# Group 12: Smart Alerts

## ## Mission

Warn users about suspicious spending.

Add alert messages that help users notice budget problems early.

## ## Required Features

Add at least these five features to your own copy of the budget tracker.

1. Warn when balance becomes low.
2. Detect possible duplicate expenses.
3. Warn when one expense is unusually large.
4. Warn when a category suddenly increases.
5. Keep an alert history that the user can view.

## ## Stretch Ideas

- Let the user choose alert limits.
- Clear old alerts.

## ## Beginner Instructions

1. First make sure the base budget tracker runs.
2. Add one feature at a time.
3. After each feature, run ``python main.py``.
4. If the app breaks, undo only your last change and try again.
5. Prepare a short explanation of what each feature does.

## ## Presentation Tip

Do not only show code. Show the menu, add sample data, run your new feature, and explain the part of the code your group changed.
