

Group 2: Category Limits

Mission

Stop users from overspending in one category.

Let users set spending limits for categories like food, transport, and data.

Required Features

Add at least these five features to your own copy of the budget tracker.

1. Create a monthly spending limit for a category.
2. Show the remaining amount for each category.
3. Warn the user when a category is close to its limit.
4. List categories that have gone above their limit.
5. Reset category spending for a new month.

Stretch Ideas

- Add default Nigerian student categories.
- Show the most used category.

Beginner Instructions

1. First make sure the base budget tracker runs.
2. Add one feature at a time.
3. After each feature, run ``python main.py``.
4. If the app breaks, undo only your last change and try again.
5. Prepare a short explanation of what each feature does.

Presentation Tip

Do not only show code. Show the menu, add sample data, run your new feature, and explain the part of the code your group changed.
