

Group 4: Search And Filter

Mission

Find records quickly.

Improve the tracker so users can search and filter old income and expense records.

Required Features

Add at least these five features to your own copy of the budget tracker.

1. Search transactions by keyword.
2. Filter records by category.
3. Filter records by income or expense type.
4. Sort filtered results by amount or date.
5. Show the balance for only the filtered records.

Stretch Ideas

- Add search by amount range.
- Show how many results were found.

Beginner Instructions

1. First make sure the base budget tracker runs.
2. Add one feature at a time.
3. After each feature, run ``python main.py``.
4. If the app breaks, undo only your last change and try again.
5. Prepare a short explanation of what each feature does.

Presentation Tip

Do not only show code. Show the menu, add sample data, run your new feature, and explain the part of the code your group changed.
