

Group 9: Spending Lock

Mission

Protect a target balance.

Warn users before their spending pushes them below a safe balance.

Required Features

Add at least these five features to your own copy of the budget tracker.

1. Set a minimum safe balance.
2. Calculate how much the user can safely spend.
3. Warn before adding an expense that breaks the safe balance.
4. Create a daily spending limit from the safe balance.
5. Allow the user to reset the safe balance target.

Stretch Ideas

- Add emergency expense override.
- Show remaining safe spending for the week.

Beginner Instructions

1. First make sure the base budget tracker runs.
2. Add one feature at a time.
3. After each feature, run ``python main.py``.
4. If the app breaks, undo only your last change and try again.
5. Prepare a short explanation of what each feature does.

Presentation Tip

Do not only show code. Show the menu, add sample data, run your new feature, and explain the part of the code your group changed.
